Cypress

Profile

Mobile Developer (iOS-first) building consumer and marketplace tech apps. Core skills: Swift, SwiftUI, UIKit; MVVM, Clean, VIP; Flutter; Kotlin Multiplatform;

Go microservices with MySQL, hexagonal architecture, and BFF. Focus on performance optimization, legacy refactoring, and automated testing (Quick and Nimble, Appium, Maestro), with CI/CD using GitHub Actions and Bitrise. Collaborative and data-driven;

I evaluate new approaches with evidence, explain trade-offs clearly, and use AI tools to speed delivery and improve quality.

Employment History

Software Engineer III - (Mobile developer), BETTERBE MARKETPLACE COMPANY LIMITED, Bangkok

JUN 2024 — PRESENT

Project Mobile hand on have 3 project about mobile app:

- NocNoc app(Legacy project Buyer Marketplace App)
  - Native iOS , SwiftUI, MV State + Clean pattern
- Seller NocNoc app (Support Seller App)
  - First we implement by KotlinMultiPlatform shared Logic in version 1.0.0 but some performance view update render ,Current we convert logic separate in Native
- Regional App (Renew App for optimize cost in-progress)
  - Flutter project app renew product NocNoc process in-progress (present not release yet)

Project BFF:

- Enhance API request + response in micro service in hexagonal architecture follow senior Go developer team guide (use Golang development)

Project BE:

- Enhance CRUD in each feature of Regional App follow requirement schema ticket
  - DB use MySQL and Gateway architecture (use Golang development)

Inpart manage repository use git CI to automate runner lint rule commit and CD we use Bitrise by step runners handle if push branch in CI in Gitaction follow convention we will CD in Bitrise.

iOS Developer, Technology Developer, SCG Wedo, Bangkok

JUL 2023 — JUN 2024

Stack Dev:

- MVVM Pattern
- UI : Declaritive - SwiftUI + UIStoryboard style UIRepresentable SwiftUI
- Use framework Combine , Async/Await,
- Modular module + submodule by use git repo in Podspec + Podfile

My Responsibility:

- Develop follow requirement and discuss for prefer solution on Grooming,

Planing meet.

- Develop SDK style sub module in Super App
- Develop SDE app by Flutter Dart for connect Feature SDK

Project responsibility:

- Mind application(iOS Native)
- SDE application(Flutter)

Culture:

Project develop WecomicTH app.

- About comic app

My responsibility is develop iOS app follow lead plan and squad team one team per one position to deliver product and hand on launch release manual in apple connect

Task challenge complete for me in company:

- Tuning performance image to display and optimize load.
- A lot many Ads inject plugin(TapJoy, GooglAds, Ads Unity)
- Revamp design
- Refactor code for read able in case is from MVC to MVVM

iOS Developer, Geotalent, Bangkok

JUL 2017 — JUL 2020

Project handle process software house delivery product by product and time outsource.

Working as a Agile model and Microsoft team for planing and communicate

iOS use MVP Pattern

Ever done project:

- Smart Health app project: business is show and track activity from device like Garmin, Strava, etc.
- Smart Drive app project: detect track from camera in TUYA device by feed video and display from BE response calculate summary time spend drive in company

- EGAT app project: urgent project join work sprint app in CDG company 1 month to delivery about plan map electric pole.

Education

Bachelor's degree, Kasetsart University, Sriracha

JUL 2014 — JUL 2017

When I was in university, I was working and studying and doing my university activities and fun loving person who likes to challenge and want to learn new things. It's a really fun time.

That made me grow up in the developer field today.

Including the experience of coding contests for the Hackaton show that was also a

challenging time.
